Heating-up indicator.

The "Heating-up indicator" is activated when the "Bake function" is selected, and it works as a pre-heat function so that the air fryer has the ideal temperature before cooking your favorite baked recipes. The timer only starts to count down once the pre-heating has finished.

If wished, you can skip the pre-heating step by tapping the "Play/Pause" button. The display will then show the target temperature, while the "Heating up indicator" icon will turn off and the timer will start to count down.

Shake Reminder

The "Shake Reminder" is activated during the pre-sets of some recipes, such as French Fries/Frozen Snacks, Vegetables and Chicken.

When it is time to shake or flip your food, the "Shake Reminder" icon will light up and blink for one minute, while a beep sound will repeat for three times.

The "Shake Reminder" is not mandatory, hence the cooking will continue as usual even if the food is not flipped or shaken.

升温指示
